*I.IEK = Vocational Training Institutes

Summary

I am a **Junior Software Engineer**, Graduate* of I.IEK ΑΑΦΑ*, with an **overall three years** into my field and more than **one year** of work experience, looking to develop my skills in both back-end and front-end **software development**. A major part of my working experience based on Microsoft's **.NET Framework**, more specifically with **ASP.NET Framework**, and **CI/CD** practices on a JEE product. In the past year I have developed an interest in **Web Development**, and currently I am looking into advancing my knowledge and skills regarding web development.

Academic and personal knowledge includes: Java, C, C++, C#, vanilla JS, HTML, CSS and CSS frameworks, OOP practices and modern software lifecycles and maintenance.

Work Experience

.NET Junior Developer

@ [Byte Computer A.B.E.E](#) – 2/6/2020 - 4/1/2021

- Software developer at, various **MVC** structured, **ASP.NET** (Framework 4.8 and older) products, with responsibilities that would include bug fixing, **code re-formatting** or **fixing versioning issues** caused by badly formatted .aspx files. Through those products, some experience with MS SQL was gained.
- Took extended training in **Microsoft's 365 Power Platform**, which included development in **Power Apps**, combining and using Power Automate with other components and/or products, and using SharePoint's online capabilities alongside Power Apps and Power Automate.
- For each of the above, two Projects were created to demonstrate my knowledge and understanding of the given tasks I was to be assigned. Those include a leave request app based on the company's business needs, created as a Power Apps Canvas app, and a Employee management web app on ASP.NET Framework 4.8 using MVC structure.

Continuous Integration (CI) Engineer Internship

@ [UNIFY](#) Greece – 2/1/2020 - 2/6/2020

- CI Engineer on a **Scrum** team, with responsibilities such as **developing**, **monitoring**, and **supporting** Continuous Integration (CI) pipelines, setting-up new **test suites** on a CI environment, and **analyzing** CI tests results.
- Learned and used Tools/Frameworks such **Jenkins**, **Selenium**, **VMware**, **TestNG**, **Maven**, **Git**, **WLS** and **Groovy**, while getting familiar with **Agile Software Development** and CI related subjects like **testing methods** on a big and scalable product (Product name: **Circuit**).

Back-end VB.NET developer - 1/9/2019 - 27/9/2019
